

WYCOM
Simple, Seamless, Secure

Omni

Check CENTRAL!

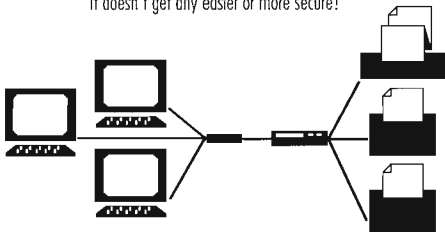

Looking for a network solution to automate your check signing and printing? A complete system that can be custom formatted and programmed to meet the exact needs of your company? All while providing the highest security features in the industry? Look no further. The revolutionary, new, Wycom/Omni is your key.

Easy! No product on the market is so simple! The Wycom/Omni is a TRUE plug-and-play solution. That's right. Open platform and software independent, all programming is done at the factory. That means NO mechanical downtime, or hassle of learning new software applications. Just connect the Wycom to your network, turn on the key-activated, security system, and you're ready to securely automate your complete check signing system.

Powerful! This peripheral can easily handle your most graphic intensive files for printing and signing

Dot Matrix or Laser?

With the Omni, the choice is yours. Just connect your factory-programmed Omni into your network and you're ready to completely automate your check signing system! It doesn't get any easier or more secure!

Why Gamble with Your Checks?

Wycom keeps your valuable signatures and forms off your work stations and under lock and key! Eliminate passwords that can be forgotten or hacked. System usage is controlled by the Wycom exclusive Executive key access system.

checks. And the Omni can save a non-negotiable, archived, graphical copy of each signed check on your network server in addition to a data file containing check dates, numbers, amounts, and payees. Meanwhile, all programming changes and diagnostics are performed over the internet.

Upgradeable! Printing with laser printers? Take advantage of the Wycom Check+MICR Laser upgrade option. Completely eliminate check stock inventory and security issues and start printing checks from BLANK safety paper today!
